

Notes: Item Marked "1" is Big Canoe Pump Station on Blackwell Creek, which feeds to "2", the Big Canoe Reservoir/Supply Station. That feeds out along the marked yellow water lines. The "?" areas are unknown at this time as to how far this water feeds. It is possible that additional supply feeds upwards from Cherokee Co. water lines, or eastward from Jasper. These marked areas are probable minimums that would be impacted by Petit Dam Failure as Blackwell Pump Station is knocked offline.
